# Flocrete SP129

#### **DESCRIPTION**

Flocrete SP129 is high performance superplasticising admixture formulated from selected polymers specially designed to enable the water content of the concrete to perform more effectively.

This effect can be used in high strength concrete mixes to improve workability, to increase ultimate strengths or to facilitate a reduction in the cement content while sustaining and improving mix properties.

#### **APPLICATIONS**

- » To produce high quality concrete of improved durability and water tightness.
- » Recommended for high strength concrete mixes.
- Improved cohesion allows for use in mass concrete pours and piling.

#### **ADVANTAGES**

- >> Improved workability reduces placing and compaction problems.
- » Allowing for high strength concrete production without excessive cement contents.
- » Cement saving without affecting strength.
- » Minimising segregation and bleeding problems by improving cohesion.
- More durable concrete as a result of reduction in permeability and lower water to cement ratio.

# **COMPATIBILITY**

Flocrete SP129 is suitable to use with all types of Portland cement and cement replacement materials. Flocrete SP129 is compatible with other DCP admixtures used in the same concrete mix.

If more than one type of admixture is to be used in the concrete mix, they must be dispensed to the concrete separately.

# **STANDARDS**

Flocrete SP129 complies with BS EN 934-2:1998 and ASTM C494, Type F.

# **TECHNICAL PROPERTIES @ 25°C:**

Colour: Dark brown liquid

Freezing point: ≈ -1°C

Solid contents: 42 ± 1%

Specific gravity: 1.25 ± 0.03

Air entrainment: Less than 2% at normal

dosage

Chloride content: Nil

#### **METHOD OF USE**

Flocrete SP129 should be added to the concrete with the mixing water to achieve optimum performance.

An automatic dispenser should be used to dispense the correct quantity of Flocrete SP129 to the concrete mix.

# **DOSAGE**

The recommended dosage of Flocrete SP129 is 1.0 to 3.00 litre per 100 kg of cementitious materials in the mix, including GGBFS, PFA or microsilica.

Representative trials should be conducted to determine the optimum dosage of Flocrete SP129 to meet the performance requirements by using the materials and conditions in actual use.

# **EFFECTS OF OVERDOSAGE**

Overdosage of Flocrete SP129 will cause the following:

- » Significant increase in retardation.
- » Increase in workability.

Ultimate concrete strength will not be adversely affected and will generally be increased provided that proper concrete curing is maintained.

# Flocrete SP129

#### **SETTING TIME**

Although the setting time is dependent on the dosage of Flocrete SP129, the following factors should be considered:

- Retardation is increased with lower levels of tri-calcium in the cement.
- ii. Lower temperatures will delay the setting time.
- iii. SRC cement gives higher retardation level than ordinary cement.
- iv. Retardation level is increased when cement replacement materials are used in the concrete mix.

# **CLEANING**

Clean Flocrete SP129 with fresh cold water.

# **PACKAGING**

Flocrete SP129 is available in 210 litre drums and 1000 litre bulks supply.

#### **STORAGE**

Flocrete SP129 has a shelf life of 12 months from date of manufacture if stored at temperatures between 2°C and 50°C.

If these conditions are exceeded, contact DCP Technical Department for advice.

# **CAUTIONS**

#### **HEALTH AND SAFETY**

Flocrete SP129 is not classified as a hazardous material. Flocrete SP129 should not come into contact with skin and eyes.

In case of contact with eyes, immediately flush with plenty of water and seek medical attention.

For further information, refer to the Material Safety Data Sheet.

# **FIRE**

Flocrete SP129 is nonflammable.

# MORE FROM DON CONSTRUCTION PRODUCTS

A wide range of construction chemical products are manufactured by DCP which include:

- » Concrete admixtures.
- » Surface treatments
- Grouts and anchors.
- » Concrete repair.
- >> Flooring systems.
- >> Protective coatings.
- » Sealants.
- » Waterproofing.
- » Adhesives.
- » Tile adhesives and grouts.
- » Building products.
- Structural strengthening.
