4: FIRST AID MEASURES

Eyes:	Rinse immediately with plenty of water, also under the eyelids for at least 20 minutes. Remove contact lenses. If eye irritation persists, consult a specialist.
Skin:	Wash off immediately with plenty of water for at least 20 minutes. Immediately remove contaminated clothing, and any extraneous chemical, if possible to do so without delay. Take off contaminated shoe immediately. NOTE TO PHYSICIANS: Application of corticosteroid cream has been effective in treating.
Inhalation:	Move to fresh air. If breathing has stopped or is labored, give assisted respirations. Supplemental oxygen may be indicated. If the heart has stopped, trained personnel should begin cardiopulmonary resuscitation immediately. Move to fresh air.
Ingestion:	Rinse mouth. If a person vomits when lying on his back, place him in the recovery position. Prevent aspiration of vomit. Turn victim's head to the side. Do not give milk or alcoholic Beverages. Never give anything by mouth to an unconscious person. Obtain medical attention.
General Advice:	Move out of dangerous area. Seek medical advice. If breathing has stopped or is labored, give assisted respirations. Supplemental oxygen may be indicated. If the heart has stopped, trained personnel should begin cardiopulmonary resuscitation immediately.

5: FIRE FIGHTING MEASURES

Flash Point:	None.
Special Exposure Hazards:	<p>May generate ammonia gas. May generate toxic nitrogen oxide gases. Use of water may result in the formation of very toxic aqueous solutions. Do not allow run-off from fire fighting to enter drains or water courses. Incomplete combustion may form carbon monoxide. Ammonia gas may be liberated at high temperatures. In case of incomplete combustion an increased formation of oxides of nitrogen (NOx) is to be expected.</p> <p>Downwind personnel must be evacuated. Burning produces noxious and toxic fumes.</p>
Extinguishing Media:	<p>Alcohol-resistant foam, carbon dioxide (CO₂), dry chemical. Extinguishing media which shall not be used for safety reasons:</p> <p>High volume water jet.</p>
Personal Protective Equipment:	Use personal protective equipment. Wear self contained breathing apparatus for firefighting if necessary.

6: ACCIDENTAL RELEASE MEASURES

Personal Precautions:	Use self-contained breathing apparatus and chemically protective clothing. Wear suitable protective clothing, gloves and eye/face protection. Evacuate personnel to safe areas. Ensure adequate ventilation. Remove all sources of ignition.
Environmental Precautions:	Do not flush into surface water or sanitary sewer system. Construct a dike to prevent spreading.
Decontamination Procedures:	Dam up with absorbing material, e.g. sand. Take up mechanically; fill into labeled, closable containers. Use the necessary protective equipment when handling.

7: HANDLING AND STORAGE

Handling:	Emergency showers and eye wash stations should be readily accessible. Adhere to work practice rules established by government regulations. Avoid contact with eyes. Avoid breathing vapors and/or aerosols. Use personal protective equipment. When using, do not eat, drink or smoke.
Storage:	Keep away from alkali. Do not store near acids. Keep containers tightly closed in a dry, cool and well-ventilated place.

8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

Ingestion:	Prevent eating, drinking or smoking in the area of product use.
Eye Contact:	Chemical resistant goggles must be worn.
Skin Contact:	Impervious clothing and gloves. The breakthrough time of the selected glove(s) must be greater than the intended use period. Wear long sleeve shirts and trousers without cuffs.
Respiratory Protection:	Wear appropriate respirator when ventilation is inadequate.
Engineering Controls:	Provide readily accessible eye wash stations and safety showers. Provide natural or explosion-proof ventilation adequate to ensure concentration are kept below exposure limits.
