PROJECT REQUIREMENT

Task at Hand

Dharmanagar Cooperative Housing Society situated in the heavy-rain western suburb of Mumbai near the sea shore area of the Arabian Sea was seeking very good quality coating and painting products. The company had a variety of available options including the largest paint manufacturing companies in the region and globally to select from and the decision at hand was not easy for the client.

DCP offered the company full technical service and explanation during the selection process and the period of application for our durability enhanced **Repcoat FF** coating owing to its anti-carbonation, antifungal and waterproofing special effects.

Repcoat FF is 100% acrylic based coating that combined the decorative requirements of the project of a superior matt finish with a tailor-made colour and a cost effective choice for maintaining its structures within their budget.

Area Covered

13,023 m²

DCP SOLUTION

Repcoat FF is a high performance decorative, waterproof acrylic based, anti-carbonation protective coating.

One primer coat followed by two thick coats of **Repcoat FF** were applied at a total dry film thickness of 150-200 microns and used as a decorative paint with high quality matt finish.

Products and Quantities

Repcoat FF – 4,700 kg

Supply Period

May 2012 to October 2012
